

THINK AGAIN

Research Data @ Essex Project Outputs

Research Data Repository

- Metadata profile & mapping between:
DataCite
GEMINI/INSPIRE
DDI 2.1

- Repository user documentation
- Report on repository design, sample data ingest and testing
- Data repository app for EPrints:

Data Policy & Guidance

- Pilot department research data case study
- Staff research data survey and results analysis
- University of Essex research data policy
- Data management planning guidance on research office website
- Generic data management training delivered to Essex staff and students

ReCollect

EPRINTS FOR RESEARCH DATA

The ReCollect plugin transforms an EPrints install into a research data repository with expanded metadata profile for describing research data (based on DataCite, INSPIRE and DDI standards) and a redesigned data catalogue for presenting complex collections. Developed by the UK Data Archive and the University of Essex, as part of the JISC MRD Research Data @Essex project.

Available through the EPrints Bazaar.
